Language barrier voice enabled and chatbot to interact & get full closure insights

## Brief about your solution

Our solution enhances Google Wallet by enabling users to upload offline receipts via camera, extract GPay transactions, and analyze spending patterns using data from WhatsApp, SMS, and email.

Powered by Gemini 2.5 Flash, Vision API, OCR, and Google Colab, it intelligently organizes spending into wallet passes. A chatbot built with Vertex AI Agent Builder offers multilingual, voice-enabled interactions, letting users ask expense-related questions. Firebase Studio provides visual insights through charts, graphs, and timelines. The app delivers nudges, location-based alerts, and self-care suggestions supporting mindful financial decisions and mental wellness through personalized, AI-driven insights within an easy-to-use Wallet ecosystem.

### Temporary Issuer account created

A temporary issuer account has been created for [aishwaryamangipudi1735@gmail.com](mailto:aishwaryamangipudi1735@gmail.com).

Owner: aishwaryamangipudi1735@gmail.com   
Issuer Id: 3388000000022969153   
Pass Class Id: 3388000000022969153.37fba3a-ee3c-4591-8ea1-64439b758c63 

Additional details about the account can be found in [Google Pay & Wallet Console](#).

This is the newly created class definition:

```
{
  "id": "3388000000022969153.37fba3a-ee3c-4591-8ea1-64439b758c63",
  "classTemplateInfo": {
    "cardTemplateOverride": {
      "cardRowTemplateInfos": [
        {
          "twoItems": {
            "startItem": {

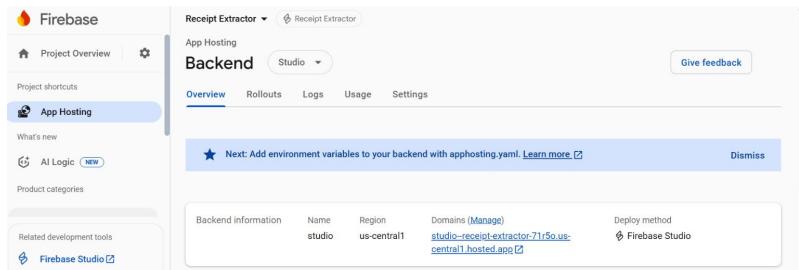

```

### Generic Pass creation in Google Wallet

## Google technologies used and their use cases

- **Gemini + Cloud Vision + Vertex AI Agent :** Use Gemini 2.5 Flash Pro for analyzing images/videos, Cloud Vision for OCR, and Vertex AI Agent for conversational queries.
- **Translation API:** Supports local languages so users can interact in their preferred tongue.
- **Google Wallet API:** FastAPI connects to the Google Wallet API to dynamically create and update smart passes, transforming Wallet into an AI-driven spending hub..
- **Push Notifications:** Uses Wallet Push API to send intelligent, real-time alerts on spending or savings.
- **Firebase Studio:** Firestore stores structured receipt,
- **Cloud Functions Backend:** Handles processing, orchestrates AI pipelines, and ties everything together.
- **Google Colab:** To load the json extracted data into GCP bucket

For Uploading receipt by user

## Features of the solution

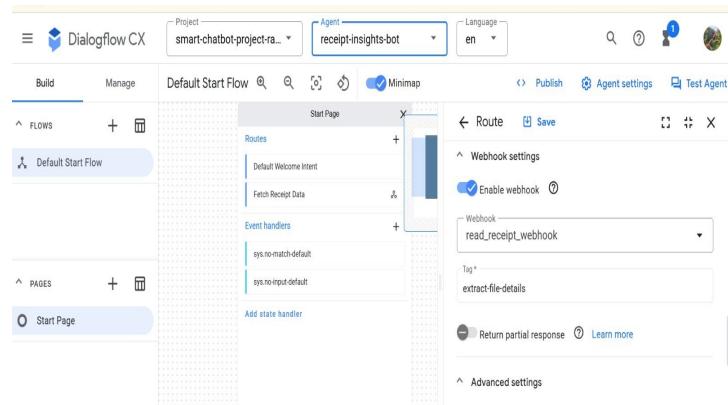

**Unified Receipt Capture** – Extracts data from offline receipts (images/videos) and online GPay transactions using Vision API & OCR.

**Smart Notes & Offer Parsing** – Collects spend reasons and offer data from WhatsApp, SMS, and emails.

**AI Chatbot Support** – Uses Gemini 2.5 + Vertex AI Agent Builder for multilingual, voice-enabled expense queries.

**Insightful Dashboards** – Visualizes spending with graphs, timelines, and category filters via Firebase Studio.

**Wellness & Alerts** – Sends personalized nudges, location-based notifications, and self-care suggestions.

The screenshot shows the Dialogflow CX interface. At the top, it displays the project name "smart-chatbot-project-ra..." and the agent name "receipt-insights-bot". The main workspace shows a "Default Start Flow" and a "Start Page". On the left, there are sections for "Build" (flows and pages), "Manage" (agents and settings), and "Default Start Flow". The right side of the interface is focused on a "Routes" section, specifically a "Route" for the "Start Page". The route configuration includes "Webhook settings" with "Enable webhook" checked and a "Webhook" dropdown set to "read\_receipt\_webhook". There is also a "Tag" field containing "extract-file-details". At the bottom, there are options for "Return partial response" and "Advanced settings".

Dialogflow CX

## Impact of the solution

Enhanced Financial Awareness – Helps users track and reflect on their spending with detailed insights and summaries.

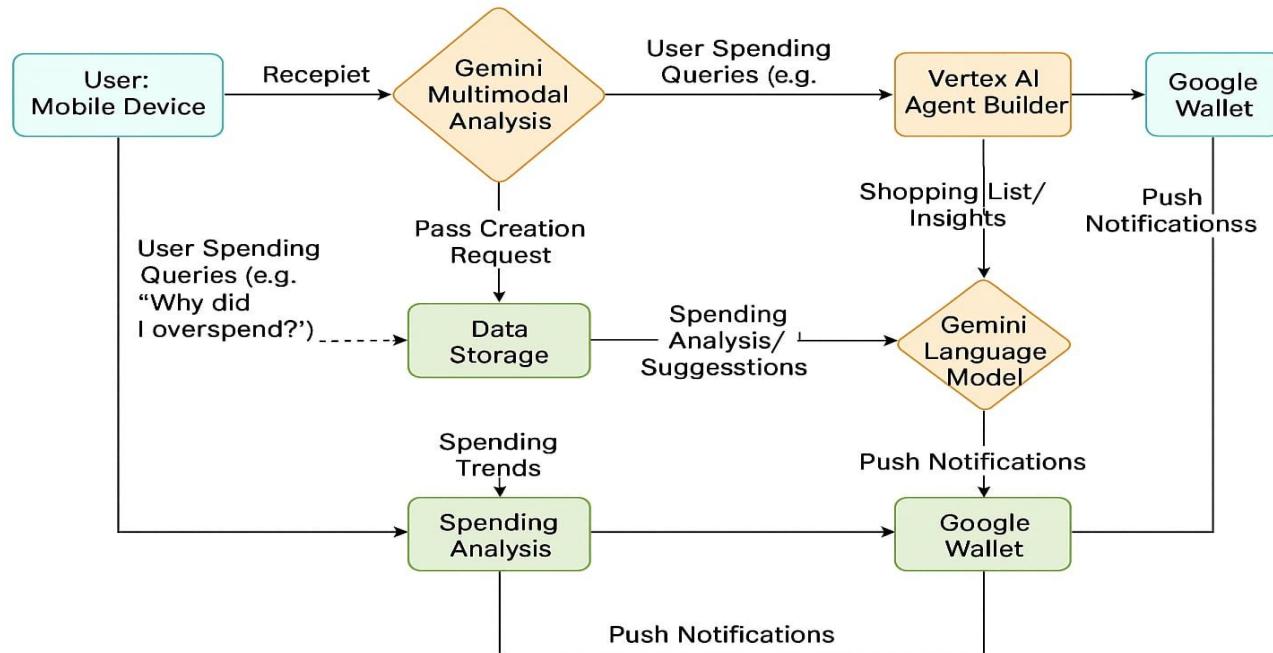

Bridges Offline & Online Data – Unifies receipts from physical purchases and digital transactions into one smart wallet.

Mental Wellbeing Support – Reduces financial stress through timely nudges, suggestions, and decision support tools.

Inclusive & Accessible – Supports voice, local language queries, and multilingual chatbot for broader user adoption.

Data-Driven Personalization – Offers contextual insights and offers based on user behavior, location, and preferences.

## Architecture diagram of the proposed solution

## How is this solution different from others

Multimodal Input Integration – Combines image-based receipts, GPay data, WhatsApp/SMS/email offers into one unified financial view.

Conversational Insights – Users can query their expenses via voice or text using a multilingual chatbot built with Vertex AI Agent Builder.

Smart Visual Analytics – Offers pie charts, timelines, and graphs auto-generated with Firebase Studio for intuitive financial understanding.

Contextual Nudges – Sends personalized, location-based, and behavioral notifications to guide better spending habits.

Self-Care & Wellness Support – Goes beyond finance by providing self-care tips and mental wellness nudges based on user behavior.

## Future scope

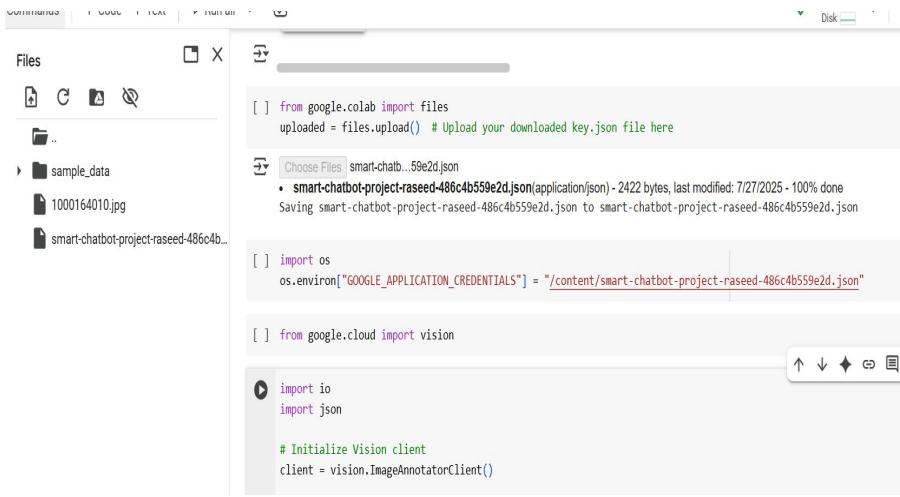

**AI-Powered Budgeting & Forecasting:** Use Gemini 2.5 Flash to predict spending patterns, offer budget tips, and auto-categorize expenses smartly.

**Unified Financial Hub:** Integrate bank accounts, GPay, SMS, email, and offline receipts to give users a 360° view of their finances.

**Smart Notifications & Rewards:** Provide location-based nudges, offer reminders, and personalized savings alerts in real-time.

**Inclusive & Multilingual Experience:** Expand with offline access, regional language support, and voice-based interactions for rural and diverse users.

**Wellbeing & Decision Support:** Empower mindful spending via mood-based insights, chatbot-guided queries, and visual analytics like graphs & timelines.
